SUPERVISORY PATENT EXAMINER

Continuation of 11. does NOT place the application in condition for allowance because:

It appears that applicant has supplied the same after final arguments presented before so examiner has provided the remarks from the previous action which address all of applicants arguments.

Applicants 1st argument is that Matson does not teach determining whether a new log entry comprises one or more required fields. Examiner disagrees, Matson teaches "Parsing may be defined as extracting information from the supplier-specific data format" and "In particular, the following fields in a supplier data record should be parsed (or constructed): supplier name, supplier product number, manufacturer name, manufacturer product number, vendor name, and vendor product number." It is clear from the cited section that Matson teach, determining if new log entry comprises one or more require fields.

2nd applicant argues that Matson does not teach using mapping rules that describe a location and format of one or more required fields. Examiner disagrees, Matson teaches, "Parsing" which is a mapping rules, parsing inherently include location and format. Therefore Matson teaches, "mapping rules that describe a location and format of one or more required fields."

3rd applicant argues that Matson does not teach extraction information from the new log entry only if the new log entry comprises the one or more required fields. Matson teaches "Parsing," which only remove content if it matched the selected criteria. Therefore Matson does teach, extraction information from the new log entry only if the new log entry comprises the one or more required fields.

4th applicant argues that Landry does not teach, a method of maintaining a database for managing a process of a plurality of transactions through two or more applications. Presently examiner is unclearly why applicant is arguing this limitation, since in the final rejection examiner cited Matson for this limitation. Therefore this argument seems moot since it does not discuss the cited prior art.

Therefore in conclusion the arguments presented fail to persuade the examiner that the current claims overcome the prior art or record.
